

Epiwork 4th Project meeting, Turin, May 30-31 2013
ISI Foundation
Via Alassio 11/c 10123
Turin

This fourth and last project meeting is not only the usual check point of the activities of the project within the consortium but also, more importantly, as a moment to assess the final integration effort and joint research among the partners and among the Work Packages, in preparation for the last review meeting. The meeting will allow, as the previous years, all partners to provide a summary of the activities undertaken and the progress of the research activities. As the previous years, we will also have all the formal moment of the consortium with the Steering committee meeting. Emphasis will be given to the effort of the Consortium to meet the previous year feedback concerning integration, collaborations and exploitation of the results as well as the plans for the sustainability of the platforms after the end of the project.
